

Porsche Riverside

A Walter's Automotive Company

Trackside Fuel Support

All drivers, even those with street cars, please read this carefully, especially the last sentence!

Auto Club Speedway does not allow the pumping of high octane gas (which, at the Speedway is either the 98 unleaded NASCAR blend or 112 leaded) into anything other than a "Real Race Car", defined as a factory purpose-built car made exclusively for road racing, that is unregistered (i.e., no license plate and never registered previously) and has a wide fuel fill opening (i.e., no funnels allowed, no converted street cars, etc.; standard unleaded fuel fill openings will not work with the Speedway's high octane pumps). In addition, a form signed under penalty of perjury, attesting to the fact that you will only use the fuel in a Real Race Car, must be presented for each purchase of high octane fuel from the Speedway gas station. Since this is difficult to deal with for many drivers, we have therefore arranged for an easier, safe and likely less expensive solution that will also benefit those whose cars run on 91 unleaded.

Paul Oil Company will be an outside fuel vendor for us at the Festival. They will provide:

- Sunoco Standard 110 R+M/2 Leaded
- Sunoco Supreme 112 R+M/2 Leaded
- Sunoco SS100 R+M/2 Unleaded (oxygenated street legal)
- 91 R+M/2 Premium Unleaded

Accepted forms of payment: Cash, check and all credit cards

Service hours to be posted at the Sunoco Fuel truck. Fuel will be available beginning late afternoon Thursday and beginning every morning at 7:30 AM.

We are lucky to have them so please, all drivers seeking high octane or pump gas, even those who have Real Race Cars that could purchase fuel from the Speedway, please consider using Paul Oil. Prices are expected the same or less than the Speedway's fuel prices (91 unleaded will be sold at a premium to outside gas station prices, but likely for less than the Speedway's price, and unlike buying fuel from the Speedway, you support one of our vendors by purchasing from Paul Oil).

New for This Year: No Pre-order Necessary!
