

PCA Zone 8 Rules Waiver for Certain Cars Equipped with Schroth ASM® 4-point Harnesses

For 2014, Zone 8 has granted a year-long waiver for cars with less than 200 Performance Equipment points, equipped with Schroth ASM® 4-point harnesses (please see details below). Permanent incorporation into the Zone 8 Rules will be reviewed for 2015 as part of the regular Zone 8 rules process.

To aid technical inspectors at event venues, the form at the bottom of the page may be completed by a PCA-approved technical inspector/facility, and presented at subsequent events as documentation of compliance with manufacturer’s installation requirements.

Temporary Addendum to AX/DE/TT Rules, Section XIII VEHICLE & DRIVER SAFETY EQUIPMENT, Subsection A (effective calendar year 2014):

Racing harnesses are not allowed in vehicles equipped with seats having no headrest or having backrests with integrated headrest and no openings between the backrest and the headrest (e.g. stock Porsche seats). In such seats the shoulder belts will slide off occupant’s shoulders during an accident.

Schroth 4-point harnesses WITH ASM® TECHNOLOGY will be allowed to be used at Autocrosses and at DE/TT’s on cars **with less than 200 Performance Equipment points, provided they follow the above seat guidelines as well as technical inspection according to the applicable parts of Section XIII, Subsection B** (see Zone 8 AX/DE/TT Rules 2014, page 27). For 4-point harnesses, the lap belt may use the factory belt mounting points.

The entrant needs to be prepared to show documentation that the installation is within the manufacturer's recommended configurations whenever asked by a tech inspector (please see form below).

4-point harnesses with the ASM® system may be used with a HANS® device. However, The ASM® system in Schroth racing harnesses should never be used with other types of head and neck devices e.g. SFI 38.1 approved.

PCA Zone 8 2014 Tech Waiver for Schroth ASM® 4-Point Belts

Name: _____ Car Number: _____ Class: _____

PCA Region: _____ PCA Membership #: _____

Vehicle Year: _____ Make: _____ Model: _____ Color: _____
