

Time Trial Results on your Smart Phone

Web-enabled broadband device ability to follow Race Schedule and Results!

Do you want to have the Festival Schedule on your Smart Phone? Check this out!

If you have a web-enabled broadband device (smartphone, 3G/4G tablet, laptop w/broadband service, etc.) you will be able to view results as they are processed (very soon after a session ends) by going to <http://zone8.pcasdr.org>. It is suggested that you test this link now and bookmark the location. The schedule and an up to date TT class list are there too. Result sheets will appear as they are created throughout the event, so simply refresh to check them out. You may also input any combination of TT car numbers or TT classes separated by commas in the box on the third row (be sure to click Save) to highlight these cars in the TT results pages when they appear.
